

Technical Data Sheet

Product: Columnar Multi Clear Stream Jet

Product Code: 27-WA-32

- NCA's Columnar Multi Clear Stream Jet is designed for the creation of a low pressure, highly visible column of crystalline sprays.
- The Columnar jet is made from cast bronze, precision machined to hold 24 brass tubes. Overall dimensions are: 109mm diameter, 102mm high and has a 1 ¼" bspf thread.
- This jet is ideal companion to spray rings or other multiple jet chambers as the pressure and flow rates are similar.
- 26-WA-32 Performance figures:

Display Height (M)	Flow (lpm)	Pressure at Jet (M)
1.0	100	1.5
1.5	120	1.9
2.0	152	2.5
2.5	173	3.7
3.0	190	3.9
5.0	231	5.6
