

Technical Data Sheet

Product: Theatre Water Screen Jets
Product Code: 40-05-150

- NCA's Theatre Water Screen jets produce a flat sheet of water, which can be mounted with the jet's outlet facing vertical, allowing images to be projected from either side of the water fan to provide an active visual display. Water display can be used as a base suitable for 75mm film or laser projection.
- The 40-05-150, shown above, is precision manufactured from Stainless Steel.
- Dimensions: 270mm diameter x 85mm high, inlet 150mm (6"bspf).

• Performance - Spray height (radius)

Display - Meters	Flow - Litres per second	Nozzle Pressure
6	29	60
9	40	85
12	47	115
18	51	130
24	56	150
30	59	170

- The 40-05-150 has 10 spacer plates, each 1mm thick which can be removed or replaced to improve the smoothness of the water display, or to suit the existing pump's capacity.
