

Technical Data Sheet

Product: Adjustable Overflow.
Product Codes: OFDC 80.

- NCA's OFDC 80 is a concealed adjustable overflow with a variable level control and has been designed to suit wall installations in membraned and non-membraned pools.
- The OFDC 80 will screen out debris over 18mm.
- The level control sleeve is internal and secured by a lock-screw and can be accessed by removing the overflow cover. The control sleeve should be adjusted to the anticipated full supply level of the pool.
- Level control sleeve can be removed if the unit is to be used as an air release behind waterfalls.
- The OFDC 80 is manufactured from Naval Gun metal Bronze with Stainless Steel fasteners.
- Order OFDC 80 for non-membrane applications and OFDCM 80 for pools with membranes.
- Flow rates: calculate flow as being equal to a 75mm diameter pipe.

Depth of water over fitting (mm)	Flow (litres per minute)
300	64
600	136
