

# BUBBLE FOUNTAINS

## Interactive Laminar Fountains

Through the magic of laminar flow technology, Bubble Fountains create sheets of pure water so thin that they look like giant shimmering soap bubbles. Place them where passersby can stick a hand in just to see what happens!

- Lend an amusing visual and interactive dimension to plazas, malls, walkways, lobbies, gardens.
- Arrange Bubbles in lighted groupings for a dramatic effect.
- Add Horizontal Bubbles, which appear to come from the side of a fountain or wall.
- Choose from three models:  
Small Vertical Laminar Bubble, up to 24" (600mm) in diameter.  
Large Vertical Laminar Bubble, up to 36" (900mm) in diameter.  
Horizontal Laminar Bubble, up to 18" (450mm) in diameter.

Shimmering,  
pulsating, unpopable...  
BUBBLE FOUNTAINS defy  
expectation!

# Bubble Fountains

## BUBBLE FOUNTAINS

**HORIZONTAL BUBBLE NOZZLE**

**SMALL BUBBLE NOZZLE**

**LARGE BUBBLE NOZZLE**

Typical bubble installation requires a reservoir/basin of size and configuration to compliment the bubble diameter.

Shimmering,  
pulsating, unpopable...  
BUBBLE FOUNTAINS defy  
expectation!

System Requirements for each Bubble Fountain:  
(Materials and labor to be provided by owner.)

- Water supply: 5 GPM at 15 PSI (0.32L/sec. at 1.05Kg/sq.cm), 100% filtered water. Filtered water is normally taken from a swimming pool-type sand filter.
- Water supply: 1 to 1-1/2" (25mm - 40mm) PVC.
- Other voltages available.
