

Technical Data Sheet

Product: Fill Spouts

Product Code: R Series – refer to table.

- The NCA Fill Spouts are designed to suit the standard pool depth of 300mm and can be made to suit deeper pools.
- Refer to the table below to see models available and their specifications.
- Optional solenoid valve can be fitted or supplied to enable the pool level to be maintained under the control of water level sensors – refer to NCA’s Technical Data Sheet on Level Sensors.
- Units are available in a raw finish or they can be painted or zinc plated at extra cost.

- Model and specifications:
