

# Technical Data Sheet

**Product: Hydraulic Water Level Control**  
**Product Code: HLS-12**

- The HLS-12 series can be supplied as a hydraulic level control for smaller pools and for connection to 15mm copper potable water supply.
- The HLS-12 is available in two versions:  
 HLS-12 for water level control,  
 HLS-12D with a 50mm overflow drain built in for bottom connection to waste.

- The HLS-12 is fitted with a tested 10mm, 3/8" BSP float valve with a miniature ball float
- The niche is made of fiber reinforced plastic (FRP) with an FRP black removable fascia which is installed with the discharge hole at the bottom of the fixture. Fascia screws are type 304 stainless steel.
- HLS-12 is to be installed so that the operating water level 20mm is below the inside upper facing of the niche.
