

Technical Data Sheet

**Product: LU60 Niche Submersible
Light Fixture**

Product Code: LU60N

- NCA's LU60N is designed and approved for IP68 allowing submergence to 2 Meters. Approved to AS and IEC standards.
- The LU60N is designed to be housed in a copper niche 160mm deep by 80mm diameter, which is fully submerged with 50mm water depth over the Lens for cooling.
- The LU60N is secured to the niche by two M5 Pan Head stainless steel screws, which allows quick removal of the light fixture for servicing.
- The light fixture is precision made from Bronze.
- LU60N's lamp socket is ceramic and stainless steel with high temperature leads.
- The LU35A is designed to accept MR16 type lamps in either 50W to 75W, 12V halogen lamps.
- Page 2 shows diagram of LU60N with a 20mm conduit brass bush side cable entry. Rear cable entry, as pictured above, is also available.
